

# MK CAT RESCUE NEWSLETTER

## WELFARE

In the month of June, we dealt with over 30 welfare inquiries.

These included, over 10 unneutered males.

In 3 of these reports, it showed that female strays were on their second summer with another litter of kittens.

Out of these 30 strays, none of them were microchipped.

## REHOMING

25 cats went to their forever homes this month.

## UPDATES

We are now in month four of no fundraising.

Sadly, for us this means we are now having to limit the amount of cats that come into care.

We are really hopeful that we will be able to start fundraising soon.

And we appreciate all of your continued support.

## STORY OF THE MONTH

A few weeks ago, we received a report of a mum and kittens living under a shed, this was a second known litter from mum. A kitten from her previous litter, now a year old was also present and had suspected to have had kittens as well! The owners had sadly moved away.

So far we have successfully trapped the young female and two kittens. We are still in the process of trapping the mum and the remaining kittens. But are determined to continue until they are safe.
